SYNODIA

Synodia means harmony in Latin.

Synodia started with the idea that cosmetics should be the same as people and nature living in a harmony.

People who are part of nature fill us with what they get from nature.

Synodia pursues natural beauty with the beauty found in nature.

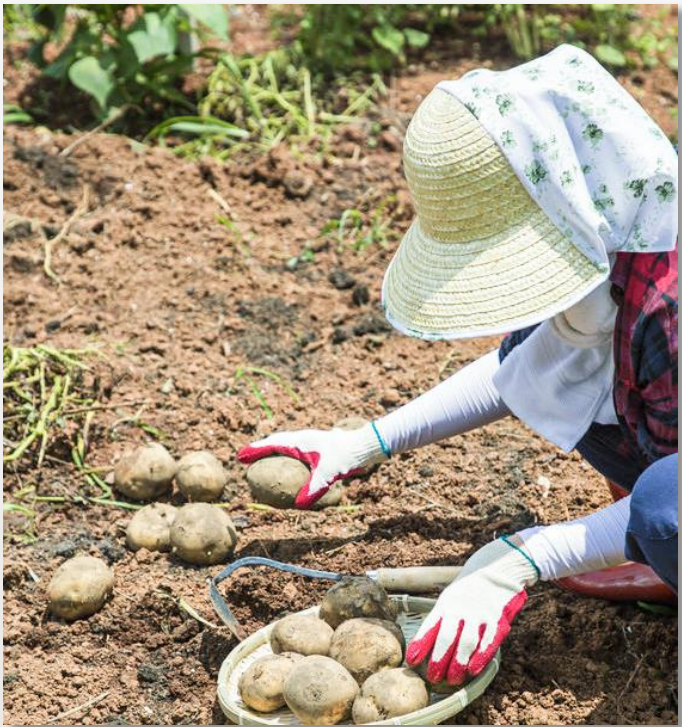

We would like to convey the healthy beauty of nature for the internal and external health of humans.

Based on a decade of natural research and development,
We produce honest cosmetics with good ingredients that we can get from nature.

From collection of ingredients to extraction and cosmetics
Start and end to make good cosmetics
Synodia, where humans and nature coexist, is with you.

Dreaming of growing together through collaboration with local farmers,
We would like to provide you a present with the beauty of Gangwon Province.

Synodia is a cosmetic produced by honest GamjaBau people with pure and good ingredients.
We hope Synodia will be with you in your daily life.

Good process necessary for good results.
We produce cosmetics correctly in proven and reliable facilities
with strict and systematic quality control.

Systematic Quality Control

Strict quality control of all processes

Management of all production quality information

Hypoallergenic test completed providing peace of mind even for sensitive skin.
A Night Cream that you can leave on while sleeping. Full of moisture.
A skin-soothing product caring for the inside of the skin that has become stuffy due to wearing a mask.

Dual function

Hypoallergenic · 26 kinds of allergen-free

With box

Dandarae X Moisture Cream

Cap. : 50 g

Hypoallergenic · 26 kinds of allergen-free · fragrance-free makes the skin comfortable
A refreshing formula that adheres without stickiness locks moisture in the skin
A product that helps improve dryness in the morning

Cosmetics that Synodia researched and manufactured.

Dual function

Patented microorganism Fermentation Cosmetics, Dermatest

With box / With set package

Redpot Recovery Toner & Emulsion

Cap. : Toner 200ml Emulsion 150ml

Hypoallergenic test, Derma test completed.

[Toner]

Fermented cosmetics made by fermenting sorghum with synodia special microorganism, Raoultella ornitholytica.

It is a product that helps maintain clean and healthy skin by containing patented ingredients that help improve inflammatory skin.

[Emulsion]

Fermented cosmetics made by fermenting Sophora Japanica with patented microorganism, Lactobacillus rhamnosus vitaP1.

It contains (S)-Equol, which can only be obtained in nature, so it is a more effective product in preventing wrinkles and aging.

Completed a technology transfer contract with the Agricultural Technology Commercialization Foundation of the Rural Development Administration

Point

Patented technology applied

Anti-inflammation effects of potatoes

- 1) Anti-inflammatory composition comprising a fraction of potato skin extract as an active ingredient
- 2) Anti-inflammatory composition comprising color potato skin extract or active fraction thereof

Patent Technology contract with Rural Development Administration

- 1) Patent app. : 제10-2019-0164120호
- 2) Patent regd. : 제10-1341819호

Potatoes from high altitudes in pure nature Gangwon-do
Potatoes that help relieve inflammation and soothe the skin

Soothes and moisturizes irritated and dry skin

Point

Potatoes from **high altitudes in pure nature Gangwon State**

Potatoes that help relieve inflammation and soothe the skin

Potato water, potato juice, potato extract and potato peel extract are included in the product through **four special extraction methods**.

**Four special extraction methods,
to fill better ingredients**

✓ **Steam Distillation**

Reduce the damage to potatoes to obtain a large amount of fresh potato water.

Solanum Tuberosum (Potato) Pulp Water

✓ **Squeeze Extraction**

Obtain potato juice evenly balanced with the ingredients of eco-friendly potatoes.

Solanum Tuberosum (Potato) Juice

✓ **Low Temperature and Ultrasound-assisted Extraction**

It effectively acquires potato extracts by minimizing the destruction of useful ingredients of natural products.

Solanum Tuberosum (Potato) Pulp Extract

✓ **Hot Water Extraction**

Adjust temperature and time to obtain potato peel extract with know-how and sincerity.

Solanum Tuberosum (Potato) Peel Extract

Point

Floral musk powdery scent Comfortable and cozy scent resembling warm spring.

A pleasant scent spreads softly. The scent isn't irritating so it makes you want to smell again.

A design of fresh potatoes. Cute design with fresh potatoes from clean Gangwon Province.

The attractive potatoes, which can be countrified, has been recreated into a sensuous design.

Recommended to

- ✓ Someone who is worried about rough skin due to frequent using hand sanitizers and hand sanitizers
- ✓ Someone who wants a product that is not sticky and moisturizing.
- ✓ Someone who wants to feel cozy with floral musk powdery scents.

Gangwon GAM-JA Line Reaction

Hand cream used / 60s / Man / ★★★★★

Surprisingly, this hand cream doesn't make billiards slippery even if you put it on and play billiards immediately without gloves!

Hand cream used / 20s / Woman / ★★★★★☆

The texture is thick but not heavy, so it absorbs quickly, and the size is portable.

Hand cream used / 30s / Man / ★★★★★☆

Wish this is bigger. I am willing to buy it even if it is released in large capacity. The design is so cute, too.

Hand cream used / 40s / Woman / ★★★★★

It's small, so it's perfect for carrying around. Fragrance, usage, all good!

Used body lotion / 20s / Woman / ★★★★★

I met a body lotion that can be used all four seasons! I can't believe this body lotion that absorbs quickly and moisturizes for a long time. It's highly recommended for those looking for body lotions that are not sticky and last long!

Used body lotion / 30s / Woman / ★★★★★☆

The design is so cute. I'm satisfied because it is good for absorption and not sticky.

Used hand wash / 20s / Woman / ★★★★★

Hands aren't dry and can feel the moist after using hand wash. It smells mild and hands feel soft even after washing the hands.

Gangwon Gam-ja Hand Cream

Point

Hand Cream

Prevent skin dryness due to hand sanitizer/cleaner

Moisturizing with a soft finish without stickiness

Excellent skin adhesion with a **soft texture** like just steamed potatoes

High-content **Shea Butter** keeps **skin moisturizing** for a long time

● Synodia Gam-ja Hand Cream

Gives rough and dry skin a soft gloss with a soft texture

(Hand Cream)

Gangwon GAM-JA Line Product Test

● Moisturizing test

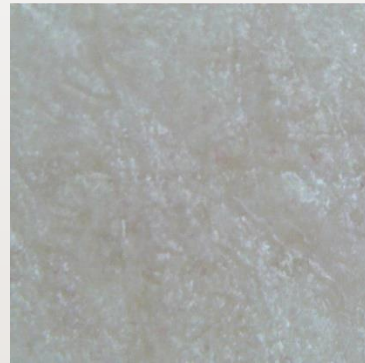

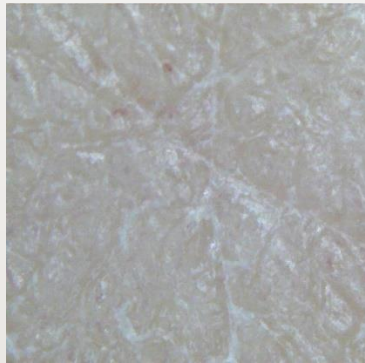

Light absorption without stickiness

Moisture and non-sticky texture gives a soft gloss to rough dry skin

(Hand Cream)

Gangwon GAM-JA Line Product Test

● Moisturizing test

It moisturizes rough skin.
Amount of dead skin cell after using the product was significantly decreased than before using the product.

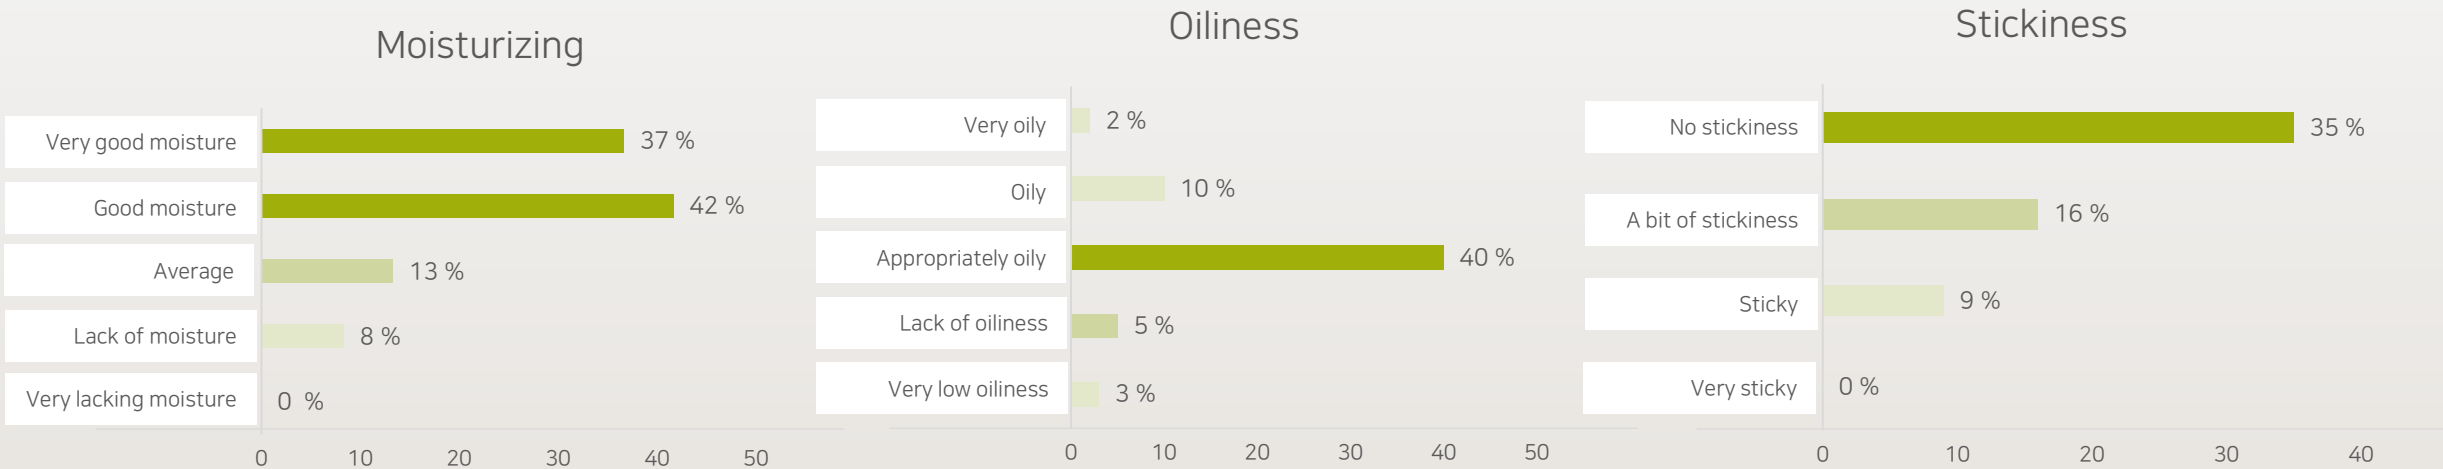

● Stickiness test

Moisturizing with a soft finish without stickiness.
After use, the skin is smooth and matte, with no residue, and only 5 styrofoam balls are attached.

(Hand Cream)

Gangwon GAM-JA Line Product Test

Self-blind test was conducted with 60 people

Gangwon Gam-ja Body Lotion

Point

Body Lotion Prevention of rough skin after shower or dry skin
Quickly absorbed and provides a moisturizing feeling with a soft finish without

stickiness

Moist formula that is easy to spread on various areas and absorbs quickly

Refreshing feeling that can be used **all year round**

● Synodia Gangwon Gam-ja Body Lotion

Moist formula that is easy to spread on various areas and absorbs quickly and absorbs freshly without stickiness

(Body Lotion)

Gangwon GAM-JA Line Product Test

● Moisturizing test

It moisturizes rough skin.

Amount of dead skin cell after using the product was significantly decreased than before using the product.

● Stickiness test

Moisturizing with a soft finish without stickiness.

After use, the skin is smooth and matte, with no residue, and only 6 styrofoam balls are attached.

Purple Night Bora Gam-ja Night Cream

Point

Night Cream

A true cooling cream providing simple care for tired skin

Premium harmony of **patented** and **natural ingredients**

Relaxing the skin tired from the external environment and lack of sleep

Providing **radiant skin** the next day by **soothing** and **hydrating** the skin.

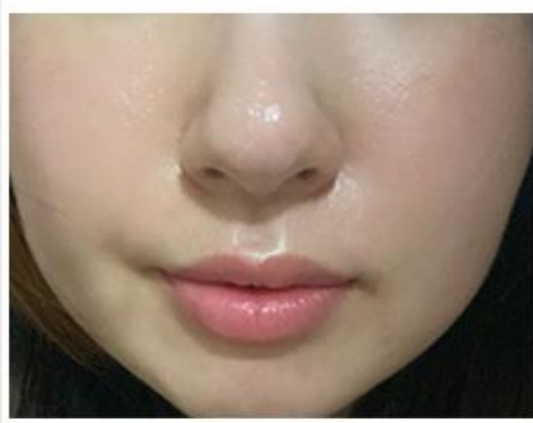

● Purple Night Bora Gam-ja Night Cream

Moisture-filled, smooth formulation adding a shimmering luster to the skin

(Night Cream)

Gangwon Gam-ja Line Product Test

● Trial Group's Testimonies

It moisturizes and absorbs well, and the skin is firm as if it has taken a full rest!

It is not heavy to apply it day and night. After a while, I feel like my complexion has become healthier and brighter!

It moisturizes the skin and has a whitening function, brightening the skin tone.

It was convenient because there is no need to remove or wash it off, and I think this cream is suitable for busy modern people!

(Night Cream)

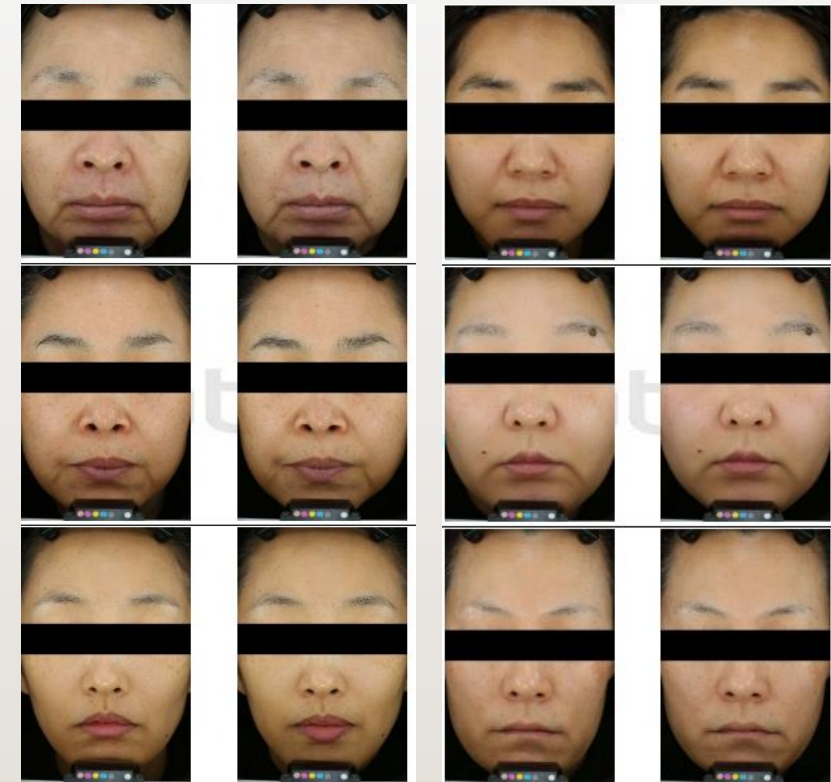

Gangwon Gam-ja Line Product Test

● Clinical test for skin efficacy evaluation

Evaluation of skin tone improvement using Chroma meter CR400

1) Compared to 'not using the product,' skin brightness value increased statistically and significantly by 2.06% after 4 weeks of use. ($p < 0.05$)

2) During the study period, no serious skin adverse reaction was caused by the product. The product is considered to have helped improve skin tone with four weeks of use.

OATC Skin Clinical Trials Center (tested with 20 people)

(Night Cream)

Gangwon Gam-ja Line Product Test

● Moisturizing test

Hydrating rough skin

Compared to 'not using the product,' the number of dead skin cells decreased significantly immediately after use.

Hydration effect

58% higher moisture content after using the product compared to before using the product.

(Night Cream)

Gangwon Gam-ja Line Product Test

● Skin temperature test

True cooling action

Reduced skin temperature immediately after use compared to before product use.

● Stickiness test

Pleasant finish without stickiness

Light and smooth formula full of moisture, freshly and gently absorbed

(Night Cream)

Gangwon Gam-ja Line Product Test

OO Jang, Wadiz Experience Group

After using the Night Cream, my skin is hydrated and radiant, and skin troubles have diminished.

What's even better is that the product is so convenient to use. All I need is to wash my face the next morning. It is not like other Night Cream, that don't dry quickly but stick to the pillow and my hair.

OO Yoon, Wadiz Experience Group

The existing Night Cream just felt like a moisturizing cream. In contrast, this product seems to form a thin film on the skin. It is completely different from other Night Cream as it absorbs well without leaving any stickiness feeling. When I woke up and washed my face, I felt it so hydrated and soft. I like it very much.♡

“Darae in Wonju, Gangwon State. I'm so glad it's you.”

It is an actinidia that grows as a vine in the mountains.

Our excellent varieties of Darae are grown in the clean and natural Wonju, Gangwon-do,
high-quality agricultural production complex.

POINT_Clean Nature Wonju Darae

Darae has a great effect on improving immune hypersensitivity
(**anti-inflammatory** effect)

- ✓ Helps with problems such as allergies and hives caused by a sharply weakened skin immunity

Darae moisturizes the skin (**anti-inflammatory** effect)

- ✓ Itching due to dry skin

Rich in antioxidants such as phenol and vitamin C (**antioxidant** effect)

- ✓ Beneficial for skin health

Synodia Dandarae x moisture cream

Point

moisture Brightning, wrinkle improvement dual functional cosmetic

It is a dual functional cosmetic that can be used **safely** even for **sensitive skin**.

It is a **hypoallergenic test completed** **26 types of Allergen Free**, **fragrance-free** moisturizing cream.

The non-stick texture absorbs without irritation and it helps lock the moisture in the skin

● Dandarae X moisture cream

It's either a heavy sticky or not too light

It's good for daily use all year round

Check point

1

100,000ppm Darae Extract

From registration to skin soothing research on the Darae found in the clean nature of Gangwon-do

Allergen-free and fragrance-free,
so you can use it comfortably without irritation even on sensitive skin.

It's too dry...

Even if you do skincare in the evening,
Are you wake up in the morning feeling dryness?

SYNODIA Dandarae X moisture cream

The synergy of Darae and moisturizing, which adds sincerity to skin soothing

Now, with one cream
Stay hydrated 24 hours a day!

✓ **Korean Kiwi, Darae.**

It takes five years for a darae sapling to bear fruit. The darae that is finally harvested can only be sold as fresh fruit for 15 days, after which its commercial value decreases, posing a significant concern for farmers cultivating darae.

Farmers, local governments, and corporations have collaborated to initiate research on darae, and the more we learned, the more we fascinated to darae. This deepened we interest and led to the registration of darae as a cosmetic ingredient, filing of patents, and trademark applications.

Through research, it was discovered that Darae has rich antioxidant effects and can improve immune hypersensitivity reactions, which led to the creation of a moisturizing cream utilizing these benefits.

성분 기본정보

성분코드	22776
성분명	다래꽃추출물
기원 및 정의	이 원료는 다래 Actinidia Arguta의 꽃에서 추출한 것이다
상품명	DANJOUNG_다래꽃추출물 ((주)단정바이오)

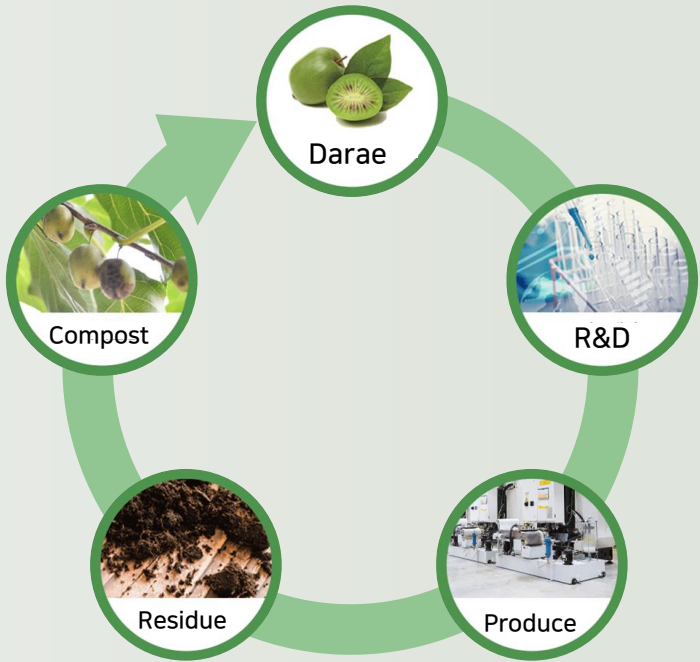

✓ **Sustainability**

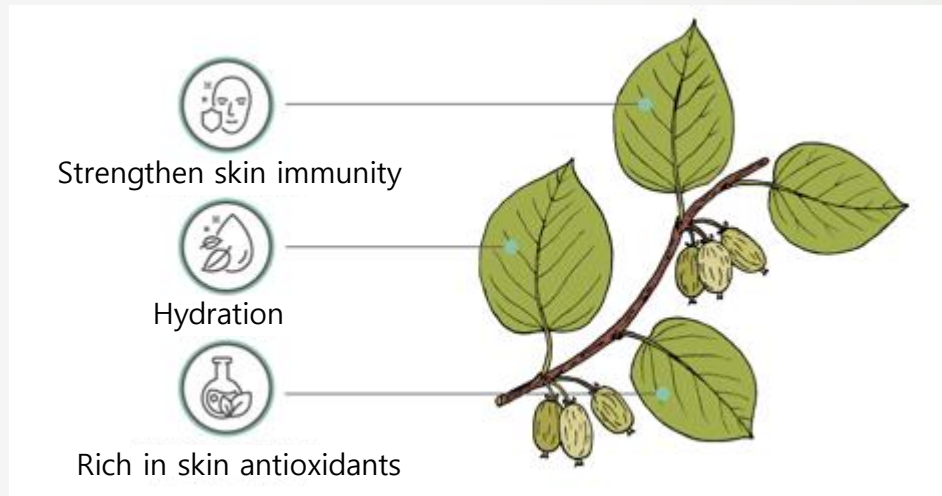

The R&D research center discovered beneficial components not only in the darae fruit but also in its flowers, stems, and leaves.

These parts, which would otherwise be discarded, were utilized as ingredients for cosmetics.

Moreover, during the production of darae extract, environmentally friendly extraction methods were employed.

The waste generated post-extraction is being repurposed as compost and feed, thereby practicing sustainability.

* Limited to the characteristics of the raw material

Great effect on improving immune Hypersensitivity reaction

Helps with troubles such as allergies and hives caused by a sharply weakened skin immunity

Moisturize the skin

Soothes the skin by providing moisture to itchy skin caused by dry skin

Rich in antioxidants such as vitamin C

Beneficial skin health effects and rich antioxidants help skin aging
Contains 3 times of kiwi and 21 times of apple

“Nutritional Efficacy of Darae”

Darae sap is rich in calcium, magnesium, and amino acids, and compared to the total mineral content, it contains a lot of calcium, potassium, and sodium. Since it also contains manganese, iron, and zinc, moisture and moisturizing care cosmetics and cleansing products are being developed using this sap of Darae.

“Functional Aspects of Darae”

The nutritional value of Darae fruit is vitamins, minerals, and dietary fiber. In particular, the vitamin C content is higher than the daily requirement for adults in 100 g of Darae (about 7 to 8 fruits of Darae), and the content is much higher than that of apples and kiwis. In addition, it is effective in preventing cellular aging and inhibiting inflammation due to its high content of vitamin B5. It is also rich in dietary fiber, so it is effective for dieting and constipation.

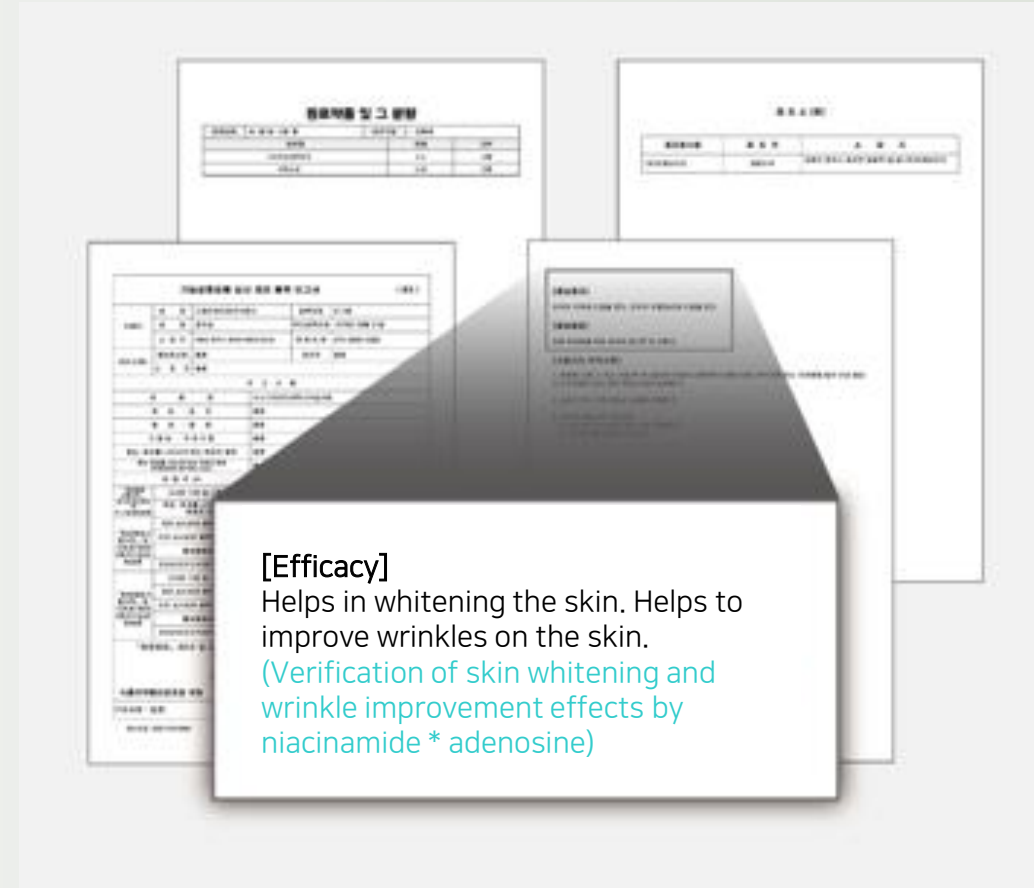

Dual-Functional

Moisturizing I Dandarae X Moisture Cream for anti-aging

BEFORE

AFTER

I think I will re-order and use it!

After washing, my skin is craving, but when I apply Danarae X Moisturizing Cream, it moisturizes even the inside of my dry skin with its moisturizing effect!

BEFORE

AFTER

I liked it because it was hypoallergenic.

If I use a bad product, the skin rises and becomes warm, but it was good because it was soft, hypoallergenic and raised immunity, and the redness of the skin decreased a lot ^^*

BEFORE

AFTER

Oh my god! It's super moisturizing right Down to the skin!

My skin was always dry, so I felt uncomfortable even though I applied it frequently. I have found my life item!!

Synodia Redpot Recovery Toner & Emulsion

Ingredients from nature, ancestral wisdom, fermentation aging method, etc.

Cosmetics created by combining elements of tradition and modern science

Redpot

Red sorghum and legumes,
Fermented cosmetics using breathing pottery made from red clay

Among the benefits of **red clay**, the most mentioned are its **enzyme components** and **far-infrared ray effects**. The enzymes in red clay each play a role in removing and decomposing toxins, acting as fertilizers, and acting as purifiers. However, many scholars claim that the greatest effect of red clay is the far-infrared rays emitted from red clay. The wavelength of far-infrared rays emitted from red clay activates the physiological functions of cells in our body and generates heat energy, which has a great effect in releasing harmful substances.

The effect of breathing pottery made from red clay

- **Breathability** : As it is heated to a high temperature, the crystal water contained in the walls of the pottery escapes, creating pores that allow air to pass between the outside and inside of the pottery. That is why pottery has been recognized as a breathing vessel since ancient times.
- **Storage** : The pores on the walls of the pottery work to push out impurities formed on the inside, so the contents have an excellent storage ability that can be stored for a long period of time without spoiling.
- **Fermentation** : The biggest characteristic of Korean foods is that they are fermented foods, and most fermented foods are fermented and aged in pots.

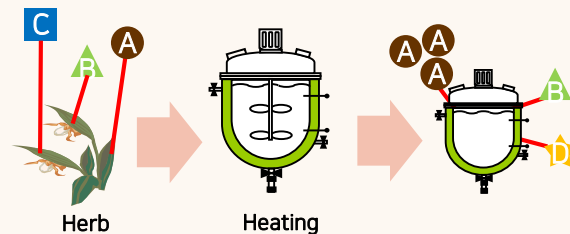

Wisdom of ancestors - Valuable decoction, fermentation, and aging for 120 hours

Decoction 24 hours

Our ancestors used thick earthenware vessels such as herbal medicine boilers to minimize temperature changes when boiling medicinal herbs.

In the decoction process, temperature, pressure, and other processing factors act to amplify, denature, or transform the medicinal ingredients in their original state into new useful ingredients.

Fermentation 48 hours (in redpot)

Sinodia Redpot Recovery Toner and emulsion are made through fermentation.

Using enzymes possessed by microorganisms, organic matter is decomposed or changed to produce effective products.

Natural products that have gone through fermentation are ripened. It becomes more stable through the process.

Ripening 48 hours

Low molecular weight using traditional fermentation techniques to increase the permeability of active ingredients, through the maturation process. The content of active ingredients increases.

Consumers with sensitive skin. Has a potentially calming effect. Due to its non-irritating properties. There is a need for fermented cosmetics.

Red energy from red sorghum

- **Sorghum 's red natural pigment: anthocyanin**

Anthocyanin is an ingredient that exists in many colors in natural products such as red and yellow, and **Sorghum** has red anthocyanin. This **anthocyanin** has an **antioxidant** effect and acts as a natural antioxidant.

Sorghum Bicolor contains a large amount of active ingredients such as fiber, phenolic compounds and tanins. The phenolic compounds consist mainly of flavonoids, phenolic acids, and **antocyanins**, mostly known as flavonoids.

- **SUSU 10 Ferm *Patented raw material**

Anti-inflammation : It helps to improve inflammatory skin with anti-oxidant and anti-inflammatory action of sorghum fermentation extract.

- **Antoxyl_S II *Patented raw material**

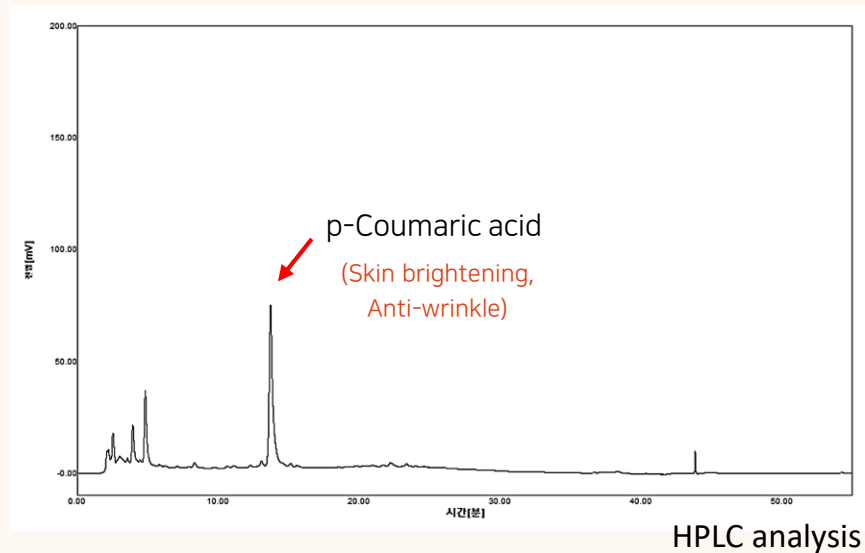

Skin protection : It helps protect the skin with the anti-oxidant and anti-pollution action of sorghum fermentants.

Red energy from red sorghum I Fermented sorghum product is effective for whitening and wrinkle improvement.

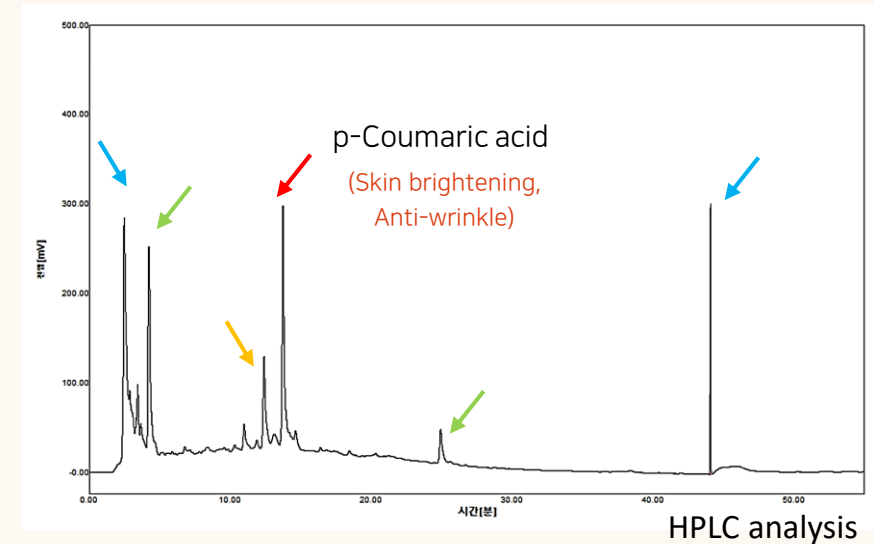

- Fermentation was confirmed as the content of p-Coumaric acid in the fermented sorghum extract increased.
- p-Coumaric acid also helps whitening and wrinkle improvement.

Content increase of various ingredient by fermentation

Before fermentation

Fermentation

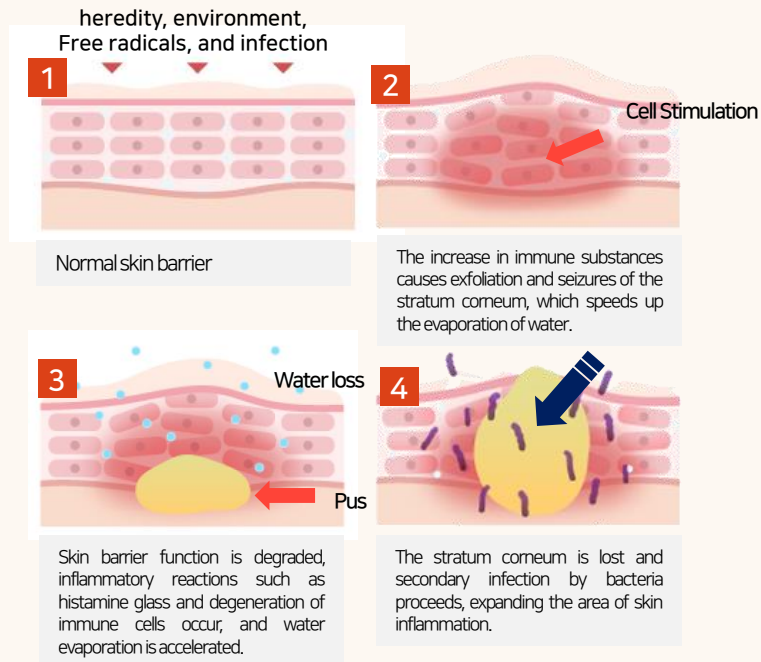

After fermentation

Red energy from red sorghum

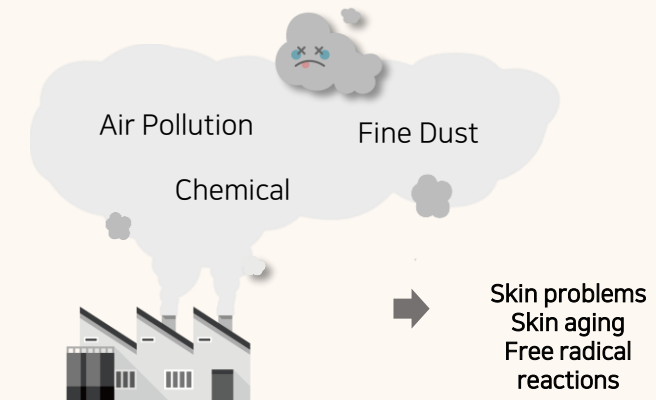

- SUSU 10 Ferm *Patented raw material

Inflammation is a physiological response that protects the body from harmful surrounding environments, such as bacteria, invasion and mechanical damage. Cells and connective tissue are damaged by a proteolytic enzyme induced by hyperinflammation, and the damage to connective tissue not only reduces skin elasticity and causes wrinkles but also adversely affects regeneration and proliferation of cells, resulting in rapid skin aging.

- Antoxyl_S II *Patented raw material

In today's urbanized society, the increase in air pollutants such as ozone (O₃), nitrogen dioxide (NO₂), carbon monoxide, and fine dust is at a serious level. Air pollutants affect not only respiratory diseases but also skin irritation and allergic skin diseases, so the Korea Meteorological Administration (KMA) is predicting fine dust and ozone warnings in weather information. Ozone and nitrogen dioxide can be seen as enemies of skin aging, just like UV rays, by causing a radical reaction in the skin to promote skin aging.

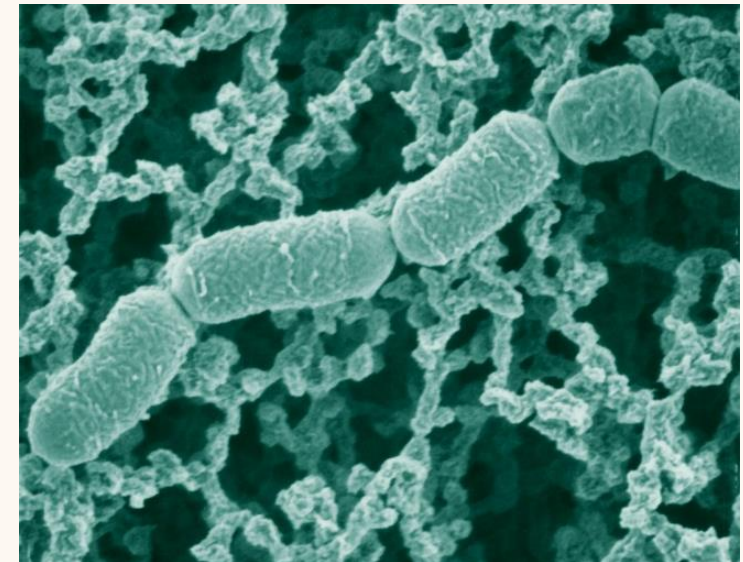

Skin care solution created with probiotics

- Common Lactobacillus | *Lactobacillus rhamnosus*

Lactobacillus rhamnosus constitutes the intestinal flora of healthy humans. As a representative probiotic, Lactobacillus rhamnosus fermented product was found to have significant results in skin elasticity and melanin index reduction, helping to improve the damaged skin barrier.

- Patented Lactobacillus from Danjounbio Co., Ltd. | *Lactobacillus rhamnosus vitaP1*

Lactobacillus rhamnosus vitaP1 is a strain discovered by Danjounbio Co., Ltd. It is a useful lactic acid bacterium that can be used for food, and is a proprietary microorganism owned by Danjounbio. This strain is a special strain that has the characteristic of **bio-converting isoflavone**, which is abundant in legumes, into **Equol** during the fermentation process, and is registered in the culture collection.

Equol

–

More effective than
isoflavone

Easy for skin absorption

Acts as a female hormone
prevent skin aging

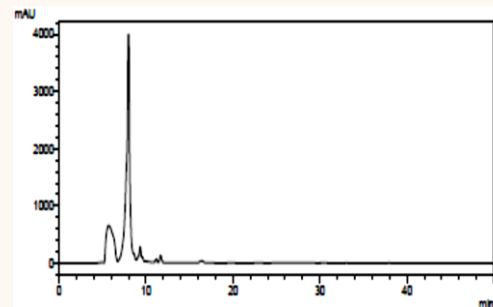

Female hormone, Isoflavone, Equol

Equal is produced by bioclimatization of isoflavones by intestinal microorganisms.

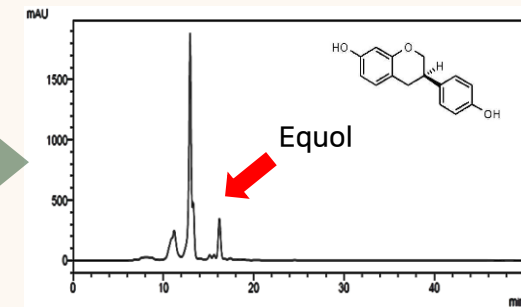

It is known to be more beneficial to female hormone-related diseases than isoflavones, which are high in soy and crops.

Even if you take isoflavones as food, more than half of healthy adults can't produce an equal.

Equol peaks were detected on the HPLC by bioconversion

Fermentation
(bioconversion)

SPL Ferm

Proprietary strains self-development

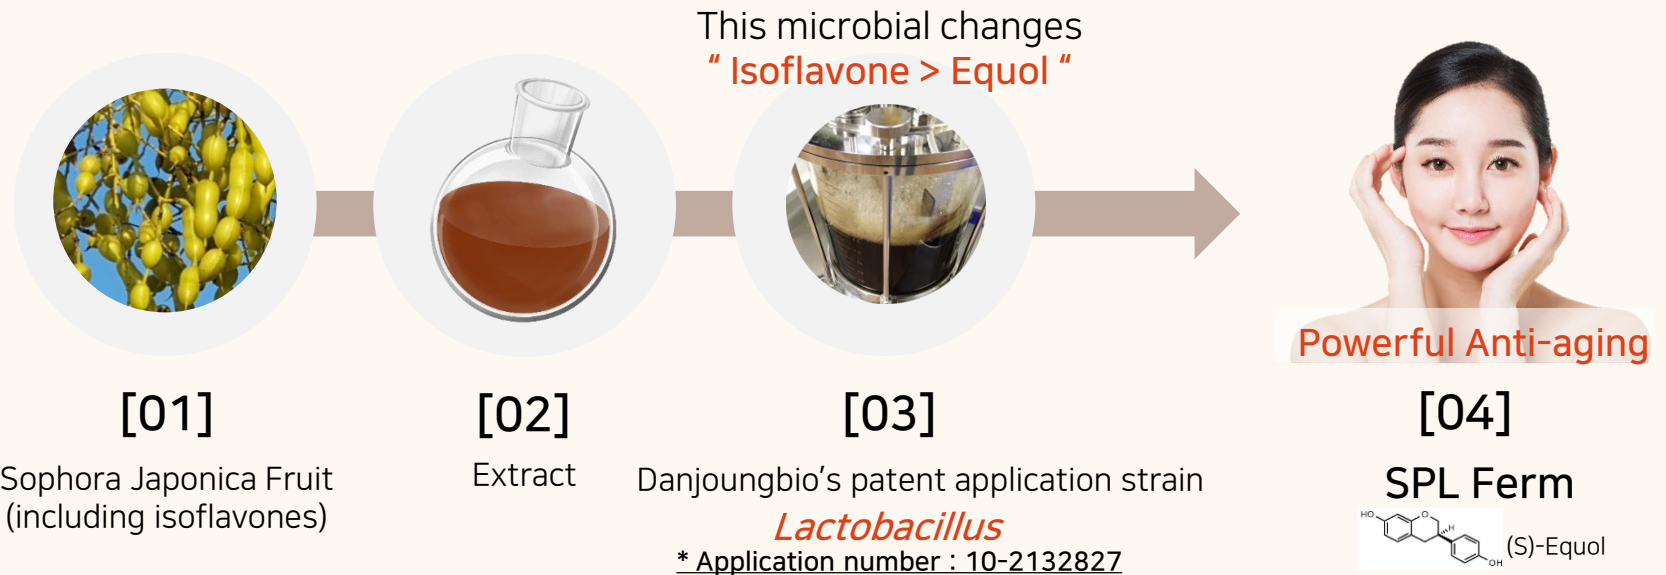

Fermentation is carried out by modifying the bacteria that convert intestinal isoflavones into equals so that they can be fermented in red pots.

Secret for youthful appearance using proprietary strains self-development

- SPL Ferm *Patented raw material

SPL Ferm is an extract fermented with *Lactobacillus rhamnosus* vitaP1 from Danjounbio.

It contains fermented compounds and Equol with Phytochemistry, and SPL Ferm helps prevent wrinkles and aging in general.

레드팟 리커버리 토너 & 에멀전

Redpot Recovery Toner & Emulsion

Ferm, the answer to your skin found from patented raw materials containing fermentation energy, makes your skin plump too. A toner that refines skin texture after cleansing, soothes the skin, and supplies moisture lost from cleansing. An emulsion that forms a protective film on the skin and helps moisturize the skin, supplying moisture and nutrition.

Anti-inflammation SUSU 10 Ferm (Patent)

Antioxidant and anti-inflammatory of fermented Sorghum extract helps to improve inflammatory skin

Skin protection Antoxyl_S II (Patent)

Antioxidant and anti-pollution of fermented Sorghum extract helps to protect skin

Anti-wrinkle SPL Ferm (Patent)

Fermented Sophora Japonica extract helps the skin health by anti-aging and anti-wrinkle
