BRIGEM INTENSIVE WHITENING SERUM BEST REVIEW

I had a lot of worries about mask problems, but I bought a whitening serum because I heard EGF is good for skin regeneration. It's not sticky and moist, so it's good to apply. I've been using it for a month, but my red skin has calmed down a lot and my skin has gotten cleaner

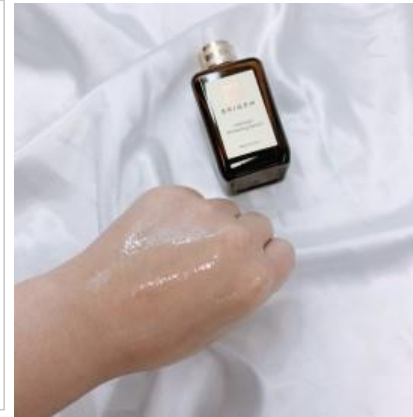

My skin tone is clearer than before, so people around me are asking what kind of skin treatment I did. My skin looks brighter and brighter, so I don't use tone-up cream anymore

dale***님

My skin got tanned a lot, so my skin tone got darker, but after using this serum constantly, it got brighter. My skin is sensitive. It doesn't sting and it's good to moisturize the inside of my skin

I put it on every morning and night, and my skin glows up. I feel confident even with my bare face

Hongh***님

I found a serum that's good for dryness because of my dry and dry skin

When I use another moisturizing serum, it gets dry after a while. This whitening serum is completely satisfying because it stays moist for a long time after going out.

It's light and moisturizing, but my skin is so soft that I'm surprised every time I look in the mirror

Moisturizing Whitening Serum is my favorite

Bridgem Intensive Lifting Serum BEST REVIEW

I found a good product when I was looking for a wrinkle-functional cosmetic because of the wrinkles of my nasolabial folds. It feels solid and soft, so it applies well. I tried it on steadily in the morning and evening, and it worked to improve wrinkles. It provides elasticity and firmness to the skin. I'm going to continue to take care of it with a lifting serum.
tmi***님

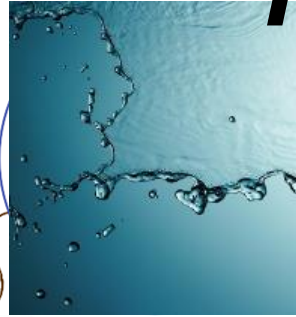

After using the lifting serum steadily, my skin became moist and smooth. My pores are wide, but when I used the serum, my pores shrank. It's not sticky and the horizontal neckline is gone. Best wrinkle serum I've ever used!!!

gleit***님

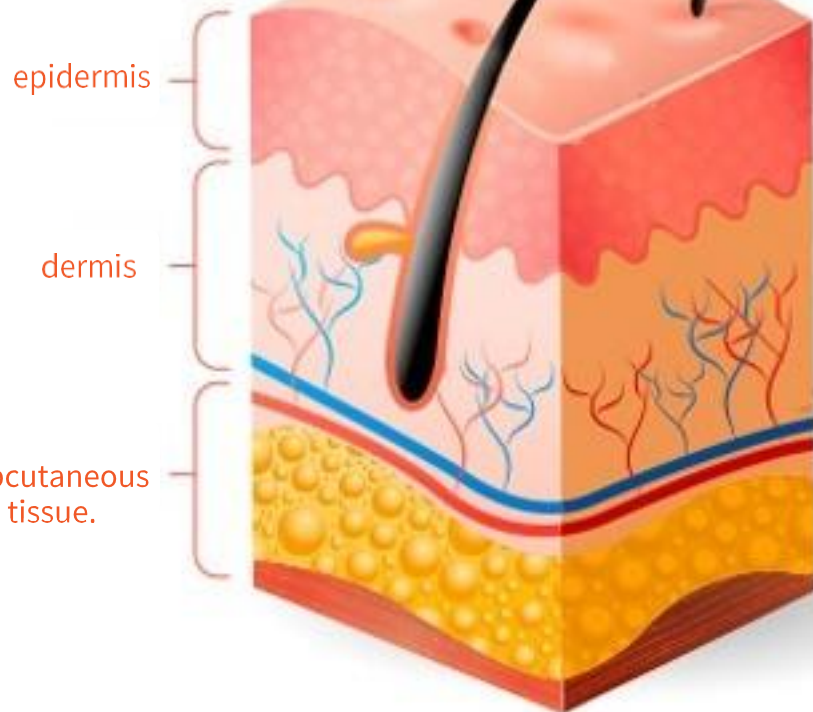

I bought both a whitening serum and a lifting serum. The whitening serum feels like an essence and moisturizes the skin. I applied the lifting serum after applying the whitening serum, and I think it works better. Since I used it together, it not only hydrated but also regenerated my skin, so my skin became healthy. It has a great synergy effect.

The Importance of Collagen

Hydrolized Collagen

Collagen, which makes up the majority of the skin's dermal layer, keeps skin tissue elastic.

But if you don't have enough collagen

As the balance of the skin layer collapses, the muscles contract

the elasticity of the skin decreases and wrinkles occur

It's a collagen product that can recover to healthy skin

We have hydrolized collagen.

It increases the density of fibroblasts in the skin

It makes the skin firm,

It creates an environment where skin collagen can form well

It hydrates the dermal layer of the skin

It helps to keep your skin moist,

For healthy skin for improving wrinkles and strengthening skin elasticity

It's a good ingredient that helps
